

**Presents**

**A Three Day Course**

# **Developing Recovery-Orientated Services**

## **Be the drivers of delivering recovery based services in your area**

*A three-day Recovery Management training course providing all the learning, skills and development needed to take your organisation forward in becoming recovery-orientated*

### **Course Outcomes**

Participants completing this course will be enabled to:

- Meet an organisational Goal of Being a Recovery-Orientated organisation
- Be the Drivers of Delivering Recovery Based Services in their area.
- Clearly understand the principles of recovery, the values that underpin the recovery process and be able to work to and achieve the outcomes their client's desire
- From a strategy for Developing Recovery Driven Services
- Communicate this vision internally and externally to the organisation

### **Course Outline**

This three day course can be residential or non-residential:

- Explore the concept of recovery and what it means in a management context
- Explore self and motivation for change
- Use person centred planning tools to explore and plan services
- Managers will design a 12 month PATH for their service
- Discuss the organisational barriers in changing services to be recovery orientated
- Design the perfect recovery service

## **PATH PLANS**

The projects will need to be jointly agreed between participants.

### **The Project Must:**

- Be Recovery orientated
- Use principles of change management
- Use existing resources
- Enable capacity building of effective recovery services
- Be true to organisations values and philosophy
- Fit in with ongoing work
- Cutting edge
- Involve the recovery trainers/mentors from the organisation as part of the process
